

Job Placements
App

PARTNERS

Training Course

On December 2016, the project's partners created and finalized the **training material**. That training material is aiming to train teachers and counselors in the *RAINOVA* model and its implementation in the job placement module.

The *RAINOVA IMM* is an Innovation Management Model designed to be applied in SMEs and micro-SMEs, as well as in Vocational Training Centers, associations and local and regional development agencies. The model is based on the idea that any organization can be innovative if its innovation tools and suggestions are implemented, regardless of its size, sector or socio-economic environment.

Jopapp training course in Zubiri Manteo.

Teachers involved in students training abroad assisted to the Jopapp training session.

Participants followed all

the training steps, working in groups and discussing the current issues and suggesting improvements for the future

At the end of January 2017, a **webinar** was held and joined by teachers and trainers, aiming at giving them the necessary tools to guide students towards innovation. The webinar explored practical changes that teachers can make in the classroom to support the development of entrepreneurial outcomes in their learners.

Jopapp mobile application

The procedure of the creation of Jopapp mobile application is in progress. The main structure of the mobile application has been created and the next step of that procedure is the pilot test. The structure of the

application contains:

- The main sessions of the application,
- The basic features and tools, which will be implemented in the application,
- The graphics and the main images,

- All the information and material, which will be available in the application.

The Jopapp mobile application implements the contents and best practices of the *RAINOVA* model, adapting it to a learning environment and creating a manual of implementation for teachers and counselors and creating an innovative app to guide students through the process of finding their work placement.

Project Meetings

The 3rd Meeting of the Jopapp Project was held from Thursday, December 1, 2016 to Friday, December 2, 2016, in Patras (Greece), by p-consulting and the meeting was attended by representatives from all project partners. During the first day of the meeting, members' representatives having presented the hitherto progress of the project,

focused on the analysis of the next steps. Then a working visit took place to the facilities of "Vergis VET College". On the second day of the meeting, partners' participants defined the modalities of creating the mobile application of the project. After that, a meeting was organized to the offices of the Federation of Industries of Peloponnese & Western Greece. At the end of the day, it took place a visit to the facilities of the Technological and Educational Institute of Western Greece, in Patras.

The meeting was very successful and had as an outcome the definition of the main structure of the mobile application, until the 4th meeting in Lisbon (Portugal).

The 4th meeting will be held on June 2017. Until then, the partners of the project plan to have completed the pilot tests of the mobile application. Furthermore, the plan for the dissemination of project's outputs will be implemented, through the scheduled multiplier events in each country.

Dissemination

25th EfVET Conference Valencia (October 2016)

This conference was held in October, in Valencia, Spain and was attended by 230 people, from Europe and beyond. Jopapp project partners held a Round Table to tell participants about the project. They also presented the main purpose of the project and they underlined the innovative methods, implemented by the project (mobile application)

Dissemination event in Tknika (January 2017)

After the welcome by José Luis Fernández Maure, director of the internationalization area of TKnika, Jopapp was presented in round tables in different turns, colleges from the Basque Country showed their interest in the project.

Some of the basic dissemination events which took place during the implementation of the project are the followings:

December 2016

JOPAPP in TEI of
Western Greece
(Patras, Greece)

Dissemination Event
in a VET College
(Patras, Greece)
